Precinct Structure Plan

Appendix 6

Conservation area 34, Northern Growth Corridor: Growling Grass Frog Corridors

Total area and boundary	<ul style="list-style-type: none"> > 1009.74 hectares > Boundaries are shown in Figures 49 a, b and c. <p>Note: The boundaries shown in Figure 49 and the Sub-regional Species Strategy for the Growling Grass Frog may be varied slightly if necessary at the precinct structure planning stage to account for site-specific issues</p>
Management category	<ul style="list-style-type: none"> > Growling Grass Frog conservation, floodplain and open space
Key rationale for protection of area	<ul style="list-style-type: none"> > Protects important populations of Growling Grass Frog and ensures connectivity between populations within the northern growth corridor
Biodiversity values of national significance	<ul style="list-style-type: none"> > Growling Grass Frog within high quality habitat
Biodiversity values of state significance	<ul style="list-style-type: none"> > Growling Grass Frog
Contribution of area to achievement of conservation outcomes in the program report	<ul style="list-style-type: none"> > Contributes to ensuring functioning sustainable populations of Growling Grass Frog with connectivity between populations
Further actions	<ul style="list-style-type: none"> > Vary Growling Grass Frog corridor boundary slightly if necessary to account for site-specific issues at the precinct structure planning stage. Any variation: <ul style="list-style-type: none"> – must not reduce the total area of the Growling Grass Frog corridor within the relevant precinct – must not impact negatively on Growling Grass Frog populations – must be demonstrated to have no negative effect on the functioning or management objectives of the corridor for the Growling Grass Frog – must be to the satisfaction of DEPI – must be documented in the conservation management plan > Protect conservation area through the following actions: <ul style="list-style-type: none"> – apply appropriate planning provisions to the land depending on the circumstances (may include a Rural Conservation Zone, an Environmental Significance Overlay or another statutory mechanism) to be determined by the State Minister for Planning – prepare conservation management plan(s) and ensure planning provisions for implementation and funding are in place – establish management agreements with landowners under section 69 of the <i>Conservation Forests and Lands Act 1987</i> and/or transfer land to Crown to be managed by Melbourne Water
