PAKENHAM EAST DEVELOPMENT PLAN

The attached submission represents the views of the Nar Nar Goon Progress Association which I fully endorse. From a personal perspective however, I would like to make the following comments;

In 2016 I sold my house in Reservoir after 35 years as I could no longer tolerate the substantial increase in residential development density and the problems that this raised. Problems such as the absence of street parking, increased traffic congestion on local roads and public transport. The substantial increase in population and the reactive manner in which local and state infrastructure and services have been addressed meant that existing residents experienced increased difficulty and delay in accessing these services.

I decided to move to Nar Nar Goon which exhibited a village like environment and extremely relaxed atmosphere.

In reviewing Pakenham East proposals I fear that the problems I experienced in the city will be replicated with the introduction of your strategy.

Yours respectfully
