Glen Waverley 3150 Vic

Dear Sir,

I am asking to support the case against the VPA decision in allowing building of residences of 8, 6, 5, 3 and 3 storey building. No 1 reason is there is insufficient green space around the buildings no mention of community housing such a large structure should be made to have 20% community housing. The maximum height should be a three storey building as the privacy of nearby buildings are one storey. The current concrete sky scrapers present a devastating debate. The site could be turned into a solar farm with plastic solar cells and a community farm underneath. With the current corona virus will we need the added population.

yours sincerely
