I note that the Lilydale Quarry Development has open space land either side of the existing railway.

Railways always divide communities, existing or planned.

I propose that the existing railway be partly entrenched and covered with provision for a second track and an intermediary station serving the expanded housing development be provided.

By deploying a “cut and cover” approach exploiting existing topography, the cost would be contained and a “continuous green field” would result unblighted by the intrusive divisive railway at least for the highest part of the development.

I confirm that I have read and agree to the above conditions for making a submission.

Yes
