The site must have a new train station and a duplication of the train line.

The current levels of public transport during peak hour are inadequate, let alone when 3000 new homes are built with up to 9000 extra residents!

There must be consideration for the local wildlife population, especially the kangaroos, and to ensure there is expansive space for them to roam free and be connected to the wild.

There must be new schools built or upgraded to accommodate new students to the growling metropolis, with adequate bus transport to cover these changes.

It would be expected that a Lilydale bypass is created to reduce congestion throughout the town as the area is no longer a regional town, and will now be a major suburb.

Power and utilities must be underground, and NBN FTTN must be provided to make the area attractive.

It is hoped that the development will include large open park areas, and will take advantage of the natural geography of the area to add in wet lands and a lake.

The Lilydale quarry has the ability to be an incredible and integral part of Melbourne's outer east, but only if done right. The community must steer the project, and significant overlays must exist to prevent the developers from cutting down on costs and important factors.

I confirm that I have read and agree to the above conditions for making a submission.

Yes
