Hi,

I propose that you amend the Preston Market Plans and include the following:

Protect the market as an affordable, open-air fresh food market and vibrant, multicultural community hub.

Creates livable, medium-scale housing for the site and includes affordable housing for low income families.

Is a nation leading carbon neutral development, all-electric with fossil fuel free energy, solar panels, battery storage and a microgrid.

Ensures waste reduction and reuse policies are implemented, and green bins are provided for households and commercial food composting.

Provides 18% green space in line with the green space needs identified by Council for the area.green space needs identified by Council for the area.

Please review the above and ensure that the space is one that we can all be proud of.

Kind regards,
[REDACTED]
