Bicycle Network has reviewed the documentation and generally supports the amendments. One issue that may reward further investigation and development is that of the resilience of the bicycle network adjacent to and through the precinct in times of flooding.

The Moonee Ponds Creek Trail, since the development and expansion of Docklands, now carries high numbers of bike commuter in the peak periods -- around 1000 riders currently. When the Creek floods -- a relatively frequent occurrence -- the underpasses at the road crossings become inundated and as a consequence riders divert onto alternative routes along local streets.

For example, we anticipate that Longford Street would be such a detour.

It would be advantageous to the project of the precinct plans recognised the impact of these flooding events on rider behaviour and ensured that they were accounted for in the plans.
