Subject: Stop The Wallan Quarry

Good Evening,

I refer to the Amendment C158 - Beveridge North West PSP.

I like many other Wallan residents object to the Wallan Quarry going ahead. It is not simply for the sake of objecting. We have opposed the Quarry going ahead previously due to the fact of health issues a lot of our community suffer from which would only be impacted by the ongoing dust created from the quarry. I have seen from the Epping quarry the amount of dust released into the community and atmosphere, which is quiet substantial. We have the right to enjoy our surrounds which would be highly impacted by this. We also do not need the blasting so close to our homes. Possible vibrations and movement this may cause to our dwellings. Let alone unsettle our animals that are already unsettled by fireworks and storms let alone constant blasting day in and day out. Then there is the impact of our roads in and out of Wallan that would not cope. We constantly have damages roads and pot holes already in existence and causing possible damage to unsuspecting vehicles, this would only increase. The Northern Highway in and out of Wallan would become more of a hazard than it already is. As a community we have already had the Quarry previously stopped for these reasons and ask that you please do not allow the Quarry to go ahead and take into high consideration the affect this will have on our community, our health, our homes, our lives. We came to Wallan to live a better life not to have adjustments made so as a quarry can go ahead and cause us grief. Also devaluing our homes, which would impact our retirement.

Please STOP the Wallan Quarry !!

Thank You
Marie Barden
