

Hi Samuel,

My name is Louise and I live in Wallan; I write this letter regarding quote **AMENDENT C158 – BEVERIDGE NORTH WEST PSP.**

I am very disappointed that the government would even think of putting a **QUARRY** between Wallan and Beveridge, this is very disturbing for everyone that lives in Wallan and Beveridge and should not go ahead. There are many negatives, firstly people's health, secondly our children who are going to suffer the most from this QUARRY, it is planned to be between two schools, Beveridge Primary School and Wallan Secondary Collage. I have three boys who will be attending Wallan Secondary Collage and I am very concerned about there health and for all those children who will be attending both schools, not to mention the danger to parents that will be dropping of there kids to Beveridge Primary School in such dust and bad visibility that can cause car accident as I should know, when I was dropping of my boys to school driving through High St towards the freeway when a huge amount of dust from the trucks that were working in the exact place of the plan for the **Quarry**, I was not able to see anything at all not even the cars in front of me, till this day I can only imagine of what could of have happened if we were in a car accident. Imagine what could go wrong if this were to happen everyday and the accidents that could kill people or cause life threatening injuries.

What is more important the **Quarry** or people's **health**, I say people's health so should the government if they really care. The risk is big as it can include respiratory ailments, skin, and eye problems. Long term exposure can also pose the risk of developing silicosis, a fatal lung disease, please take this as a very important health issue and stop this QUARRY from happening.

I would also like to mention the heavy traffic which will cause even more pollution and congestion on narrow country roads and destroy our roads, the vibration from this heavy traffic can also cause damage to buildings and homes.

There are many bad issues that will affect Wallan and Beveridge, the real estate of the area, the noise that will affect the students at school the bad pollution that kids and adults that will inhale for many years to come please choice to stop this QUARRY from going ahead.

I would appreciate that my name and email address stay private, thank you.
