Our family moved to the Wallan area some 7 years ago and we have enjoyed a peaceful and quiet existence since. During this time, we have seen a significant amount of development, with much building taking place to accommodate the ever-increasing

population up and down the Hume corridor. These families have chosen to establish themselves in this area as it provided a safe and convenient location to settle down. Over the past couple of years residents like most other Australians have been dealing with difficult circumstances just living day to day. Now that there is some light at the end of the tunnel, we are having to deal with this nonsense yet again.

The proposed quarry will create an environment where people's way of live will be significantly affected by the presence of the following;

- vibrations (potential disruptions to surrounding homes),
- dust (no one wishes to breath in),
- excessive noise (taking away from the little country feel still remaining),
- further traffic congestion (which at times is questionable as it is),
- negative impacts the overall health and well-being of residents

as well as diminished liveability of the area which could affect future potential of the area.

The proposal outlines how great the addition of the said quarry will be for the precinct, however neglects to address the scope of negative effects that will be experienced by residences now and for many years to come. This quarry should it go ahead will not add value to the area it will drive residents out of the area. The parties involved in the proposed quarry are focused on the convenience of the proposed site and ultimately the money being made / saved at the expense residents.

WE DO NOT WANT THIS QUARRY! PACK UP AND TAKE IT ELSEWHERE
