Subject: Objection to Amendment C 158 - Beveridge Northwest PSP

To Whom It May Concern,

Please accept this email as a formal objection to the application for a quarry permit. We have been advised that Conundrum have 270 letters of support, from people who do not reside in Wallan and who will not suffer the ramifications of a quarry within their community. As a resident of Wallan, myself and my family value our community greatly and feel that the quarry will endanger the quality of life we have in Wallan in several ways.

A) Firstly, traffic congestion is already a major concern for anyone who takes the Northern Highway- residents of Wallan and Kilmore and other small communities along the way have to face the long commute home and the congestion adds at least 15 minutes to our journey and longer some days. Having the quarry there will add further to this. Quarry trucks and the added traffic thereof will spell disaster for us just trying to get home in a timely manner

B) Our property prices will plummet causing residents great financial concerns. We are all working class people in wallan who just want to pay oir mortgages off and live a quiet peaceful life. With our property pricess going down, we will no longer be able to have equity in our homes.

C) Dust, noise and damage to our homes via cracking is another concern. The Epping quarry has caused a lot of distress to residents who voice their lossess re above points quite blatantly on their dedicated Facebook group

D) This is our home..We live here we have chosen to make a life for ourselves here. Wallan is a thriving community that is peaceful..it is not a place where large corporations can come and wreck havoc with our environment, we need to protect this place we call home

Please take note..my objections may not be eloquent but they are heartfelt and echo the sentiments through our community. Please as a council, put your citizens first.

Regards
