Subject: Amendment C158-Beveridge North West PSP

We do not want a quarry in Beveridge. I have been a resident of Beveridge on and off for over 40 years!

We are a growing community on the outskirts of Melbourne with the population only growing bigger. This is a perfect opportunity to make the area more sustainable for the future. Quarries are bad for the environment in several ways. They abruptly interrupt the continuity of open space, ruining habitats for flora and fauna, cause soil erosion, air and dust pollution, loss of land, and deterioration in water quality. When they are near residential areas, they create noise hazards because of blasts from heavy machinery. Not to mention an increase in traffic, eg transport lorries in an area that is already heavily congested at peak times.

NO QUARRY!
