The quarry is in the wrong location. It is in residential growth corridor. With COVID 19, people's health outcomes have changed with COVID long term effects. Any safety and outcomes effects done on having a quarry in the middle of a built up area may be redundant now, and have to be re looked at with a new health and well-being lens (including the need for fresh air without particles such as dust). Wallan is an area with high and changeable winds (being in a valley). I know it is close to highways and may be convenient, but the growth and long term COVID changes to people's health outcomes, change the dynamics of putting a quarry in a high growth residential corridor. Thanking you kindly for your consideration.

**I confirm that I have read and agree to the above conditions for making a submission.**

Yes

**I agree to the Collection Notice**

Yes
