Good Morning

Looking at the proposed drainage system I have a few questions in relation to mainly
The properties

I am wondering after the independent survey was completed and Plan 1F was the most desirable the drain and lakes have since been moved from behind these properties where there is no properties, just farmland (the lowest point) to on these properties where there are existing dwellings currently existing. Which would been they either sell up or it is compulsory Acquired.

I also am questioning shy number 300 has been specifically removed from this open space.

Any honest feedback would be appreciated on this matter as it clearly makes no sense to me at all. I look forward to the response on this one.

Kind regards
