1404916				Main road Howe Street will need to have improvements made. The increased amount of traffic which will use this road will make flow of traffic more dangerous and difficult. Already there is a major issue after traversing the round about in a northerly direction, and then turning right onto the service road into the residences along Howe St. It is a matter of life and death in peak travel times, with the extreme danger of being rear ended, and then possibly pushed into oncoming cars. *There is no turning lane. This actual scenario very nearly resulted in a fatalty in 2021. As the roads get busier the risk increases dramatically. This is a major issue already and requires evaluation and action even prior to adding more danger to the situation. Another area of concern would be trying to turn right onto Howe Street from Normlyttle Parade and Carriers Arms Drive. Some type of break in the flow of Howe Street traffic would be required		2025-10-16 22:04:29

				to safely and in a timely manner execute the right hand turn along Howe Street.
