

I am the owner of [REDACTED] in Warrnambool. I want to make a recommendation regarding the planned East of Aberline Precinct Structure Plan. For some years Aberline Road and close by roads have been used for hooning behaviour, with vehicles speeding well beyond the current speed limit on Aberline Road of 60km. Speeding of this nature will be a huge safety risk to residents and families living there now and new residents in the future. Children going out on to Aberline Road would be at grave risk of being hit by these speeding vehicles, as the situation is currently. Vehicle traffic will only increase on Aberline Road and surrounds with the East of Aberline Precinct Development. I would suggest that the East of Aberline Precinct Structure Planners take this speeding risk into account in the improvement of safety on Aberline Road and surrounds, such as a much lower speed limits on Aberline Road and surrounds and/or speed bumps placed along Aberline Road and surrounds to reduce the dangerous speeds of these motorists currently. This will much improve the safety of all with the East of Aberline Precinct Structure Plan. Thanks for this consideration. Sincerely, [REDACTED]
