

Is it possible for a "satellite / auxiliary" State emergency services unit to be located within in precinct ?

Currently at least 40% of the Warrnambool Ses unit live towards the east side of town. When members are required to turn out to an emergency, the first emergency vehicle must be in route within 8 mins. Members living on the east side of Warrnambool are unable to meet that timing. Having a auxiliary unit out east would allow these members to meet turn out times and respond quicker to emergencies.

Happy to discuss further
