

My concerns:

1. Traffic lights need to replace roundabout on Aberline Rd. Cost of traffic lights compared to roundabout is marginal in a large project like this.
2. Bus service to be implemented in very early stages on housing development. Families, residents will become isolated due to lack of transport options.
3. No wildlife corridor other than Tozer Reserve. It cannot be assumed because land was used for grazing of cattle that wildlife are not using the area.
4. Potential conservation reserve next to Tozer Reserve needs to remain and enhanced for the growling grass frog habitat.

What physical fauna flora studies have been undertaken during the growing and breeding seasons.
Not desktop studies

Indented parking in key housing development areas.

Thank you
