

Hello

I would like to provide feed back regarding the proposed development of the Aberline, Wangoom ,Horne rd. area and ask that a green buffer be provided to the existing Tozer park as there is a large Easter Grey Kangaroo colony in the park and every effort should be made to allow this to continue.

The Tozer Park also allows other wildlife to safely move through the area.

Has this been considered in planning to date ?

I look forward to hearing what provisions have been made to protect this kangaroo colony.

Regards
