

Hello,

Further to the email I sent objecting to the East of Aberline project, I'd like to know if there are any changes to the single power line and pole on my property as I'm presuming you're going to be changing over to underground power. My property  is not a part of the development.

I'd also like to know what would happen to the fixed wireless NBN that my home has to the tower on Horne road. I already have a bad signal that drops on a daily basis due to the Cypress pines behind my home that are dangerous on a number of levels. I can't even get a TV signal these days.

I really don't want this rabbit warren of a development next to my property in any way, shape or form. It is truly nauseating to go into the badly designed roads anywhere from Mortlake road to Aberline road. Please don't do this. It's a country town that should be have decent sized blocks and roads that make sense. Just because developers have billions of dollars doesn't mean they should not include quality of living and life into these developments. If you truly want to attract families to Warrnambool, make the blocks larger, they can buy postage stamp sized blocks and live in labyrinths in Melbourne or Geelong. Be different, do better, please.

Since this will be going ahead please ask the developer to contact me so I can sell them my 2 acres.
